

IN THE SPECIFICATION

Please replace the paragraph starting at page 2, line 25, page 3, line 6 with the following.

And as manufacturing methods of ink-jet recording heads characterized in that a growing direction of bubbles and an ejecting direction of ink are the same, Japanese laid open patent No.58-8658 Laid-Open Patent No. 58-8658, for example, discloses a method that a base plate and a dry film as an orifice forming orifice-forming plate (hereinafter referred to as an "orifice plate") are stuck together via another dry film with patterned liquid paths so as to form orifices by photolithography afterward. Japanese laid open patent No.62-264975 discloses a method that a base plate where pressure generating elements are formed and an orifice plate fabricated by electroforming are stuck together via a dry film with patterned liquid paths.
